SUBJECT	New Bandplan for the Expanded 40m Band		
Society	EDR	Country:	Denmark
Committee:	C4	Paper number:	17
Contact:	Hans O. Pyndt, OZ5DX	e-mail:	oz5dx@adr.dk

Introduction

A new bandplan for 40m is proposed after the expansion of 40m on 29 march 2009.

Background

At WRC03 the amateurs in Region 1 and 3 gained access to 7.100-7.200 kHz as a primary user after the transfer of the broadcasting service to 7.200-7.450 kHz.

40m is a band used for national, for regional as well as for international communication. A new bandplan should therefore be coordinated with the other regions, and discussions should start now.

Proposal

The proposed bandplan for 40m is shown in annex 1.

Recommendation

The band plan as shown in Annex 1 for 40m is endorsed from 29 March 2009.

Annex 1

7.000 - 7.050 kHz	NB	CW
7.050 – 7.075 kHz	MB	Digimode
7.075 – 7.200 kHz	WB	Phone

NB Bandwidth less than 200Hz

MB Bandwidth less than 500 Hz

WB Bandwidth less than 2700 Hz
